VERSION 20090616 (June 16, 2009)

FREQUENCY CODEBOOK FOR THE ADVANCE RELEASE OF THE
2008-2009 ANES PANEL STUDY

CONTENTS

-
1. NOTE ON DOCUMENTATION
 2. NOTE ON ADVANCE RELEASE DATA
 3. NOTE ON JUNE 2009 RE-RELEASE DATA
 4. NOTE TO USERS OF SPSS PORTABLE (.por) FILES
 5. VARIABLE FREQUENCIES

>> 1. NOTE ON DOCUMENTATION

The primary documentation of the Panel Study Advance Release is contained in the "User's Guide to the Advance Release of the 2008-2009 ANES Panel Study." That guide is available on the ANES web site (www.electionstudies.org) in PDF format.

This Frequency Codebook lists the variable names, labels, codes, and frequencies for the numeric, non-continuous variables on the data file.

Please see the User's Guide for more documentation.

>> 2. NOTE ON ADVANCE RELEASE DATA

The chief purpose of the advance release is to make interim data available to the user community as quickly as possible. The advance release data are preliminary and are subject to revision, and the documentation is not complete. Standard ANES data quality control procedures have not been completed with the data, so users should expect to find errors and inconsistencies in the data file. The full release of the data will occur in December 2009.

For more information, please see the User's Guide to the Advance Release of the 2008-2009 ANES Panel Study available on the Panel Study page of the ANES web site.

>> 3. NOTE ON JUNE 2009 RE-RELEASE DATA

The following changes have been made to the Advance Release Data for the June re-release of the 2008-2008 ANES Panel Study:

- 1) Party Identification variables (w1m1, w911, w1011, w1111)

have been correctly recoded and value labels have been corrected where necessary (w1m1, w9l1, w10l1, w10l3, w11l1, w11l3).

- 2) Derived variables der08w1, der08w9, der08w10, and der08w11 have been recalculated based on the new Party Identification variables.
- 3) Variables w1m1orm3, w9l1orl3, w10l1orl3, w11l1orl3 have been corrected to actually capture which version of the question the respondent was asked.
- 4) New derived variable (der17) calculating the number of names mentioned in variable w9zd2 has been added to the data set.
- 5) Variable w9ict has been added to the data set.
- 6) Various missing and incorrect variable and value labels have been corrected.

>> 4. NOTE TO USERS OF SPSS PORTABLE (.por) FILES

Users of the SPSS portable (.por) file for this Advance Release dataset will encounter some variables with abbreviated versions of variable names, as indicated below. String variables with values having length greater than 256 characters are also truncated in the .por release file. These limitations are inherent to .por file structure.

Note that the unweighted distributions below were not produced from the release SPSS portable file.

Users of SPSS data (.sav) files will not encounter these shorter variable names.
